What is this product?

Type

Shares of a sub-fund of Fidelity Institutional Liquidity Fund plc, an Undertaking for Collective Investment in Transferable Securities (UCITS).

SFDR Article 8 (promotes ESG characteristics).

Term

This fund is open-ended. The Management Company is not entitled to terminate the fund unilaterally, however, the board of directors of Fidelity Institutional Liquidity Fund plc may terminate the fund by way of liquidation or merger.

Objectives

Investment objective The fund aims to maintain capital value and liquidity whilst producing a return to the investor in line with money market rates.

Investment policy The fund invests in a diversified range of short-term instruments including high quality money market instruments (including government securities bank obligations commercial paper and other short-term obligations) high quality securitisations and asset-backed commercial paper deposits and reverse repurchase agreements.

The fund aims to achieve an ESG score of its portfolio greater than that of its investment universe. In addition through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

Investment approach Investments will have a credit quality consistent with maintaining Moody's Aaa-mf rating and a rating of AAAm by Standard & Poor's for the fund. Such ratings were solicited by the manager of the fund and financed by either the manager or the fund. On an ongoing basis, the fund will consider a wide range of environmental and social characteristics such as carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, product safety, supply chain, health and safety and human rights. For more information, please see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

Further information You may sell (redeem) or switch some or all of your shares to another fund on any Valuation Day. The fund is a Low Volatility Net Asset Value Money Market Fund and operates as a Short-Term Money Market Fund. Investment in a Money Market Fund is different from an investment in deposits, in particular, the principal invested in a Money Market Fund may fluctuate and the risk of loss of the principal is to be borne by the investor. The fund is not a guaranteed investment. It does not rely on external support for guaranteeing the liquidity of the fund or stabilising the net asset value of shares in the fund. This key information document describes a sub-fund of Fidelity Institutional Liquidity Fund plc. A separate pool of assets is invested and maintained for each sub-fund of Fidelity Institutional Liquidity Fund plc. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds. For more information, please consult the prospectus and latest reports and accounts which can be obtained free of charge in English and other main languages from the Management Company. These documents and details of the Remuneration Policy are available via www.fidelityinternational.com. The Net Asset Value of the fund is available at the registered office of the Management Company, and at www.fidelityinternational.com.

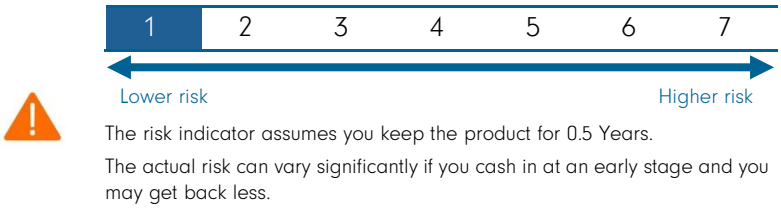

Depositary J.P. Morgan SE, Dublin Branch.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds, who plan to hold their investment for a recommended holding period of at least 6 months; who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 0.5 Years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks: none.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between (09/2019 - 03/2020).

Moderate scenario: This type of scenario occurred for an investment between (03/2019 - 09/2019).

Favourable scenario: This type of scenario occurred for an investment between (09/2023 - 03/2024).

This product does not participate in an investor compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- EUR 10 000 is invested.

Example Investment 10 000 EUR	
Scenarios	If you exit after 6 months (recommended holding period)
Total Costs	5 EUR
Cost impact (*)	0.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.2 % before costs and -0.2 % after costs.
