What is this Product?

Type: The Product is a passively managed UCITS ETF of VanEck UCITS ETFs plc, an umbrella fund structure comprising different sub-funds. Under Irish law, VanEck UCITS ETFs plc has segregated liability between its sub-funds. VanEck UCITS ETFs plc does currently not offer an exchange of shares for shares of another sub-fund. The shares are admitted for trading on various stock exchanges and can be traded on the secondary market. The price of the shares offered on the secondary market may deviate from the net asset value of the shares.

Term: No fixed term. We are entitled to terminate the management of the Product by giving at least one month notice to investors as published at least on our website.

Objective: The Product's investment objective is to replicate, before fees and expenses, the price and yield performance of the S&P Global Mining Reduced Coal Index (the “Index”). In order to seek to achieve its investment objective, the policy of the Product is to invest directly in the underlying equity securities of the Index, being the stock, American depositary receipts, global depository receipts, China B and China H shares issued by mining and metals companies whose predominant economic activity is the production of base metals and industrial such as iron ore. Further, the Product may hold the equity securities of companies whose predominant economic is in gold or other precious metal of mineral mining, however the Product does not hold physical gold or metal.
Where it is not practical or cost efficient for the Product to fully replicate the Index, the Investment Manager may utilise an optimized sampling methodology.
The Product may also or alternatively invest in financial derivative instruments which relate to the Index or constituents of the Index.
Further, the Product may use futures, swaps (for example Index swaps and equity swaps), currency forwards and non-deliverable forwards (a forward contract that does not require settlement on maturity), American depositary receipts, global depositary receipts or participation notes.
The Product may invest up to 15% of its Net Asset Value directly in shares issued by companies listed on the Shanghai Stock Exchange or the Shenzhen Stock Exchange. The Product may invest more than 20% of its Net Asset Value in emerging markets.
The Product may also invest in ancillary liquid assets and money market instruments that may include bank deposits, depositary receipts, certificates of deposit, commercial paper, floating rate notes and freely transferable promissory notes.
The Product may be leveraged through the use of financial derivative instruments; any such leverage would not be expected to be in excess of 100% of the Product’s Net Asset Value.
The Product may not invest more than 10% of its Net Asset Value in open-ended collective investment schemes.
The Product may borrow money in an amount up to 10% of the market value of its net assets at any time for the account of any Fund and the Custodian may charge the assets of the Product as security for any such borrowing, provided that such borrowing is only for temporary purposes.
The Product invests in the underlying (physical) securities that make up the Index and does not take part in securities lending.
Furthermore, the Product may not invest less than 51% of its Net Asset Value in equity securities which constitute "equity participation" within the meaning of section 2, Article 8 of the German Investment Tax Act.
The Product, using a “passive” or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Index. The Manufacturer will regularly monitor the Product's tracking accuracy. The annualised tracking error envisaged is not anticipated to exceed 0.6% under normal market conditions.

Dealing Frequency: You may purchase and redeem shares in this Product on a daily basis and in accordance with the relevant notice period.
• Product’s base currency: U.S. Dollar
• Distribution policy: Income accumulated
The Depositary of VanEck UCITS ETFs plc is State Street Custodial Services (Ireland) Limited.
The return of the Product is directly related to the return of the underlying assets minus the costs associated with the Product. If the performance of the underlying assets decreases, the performance of the Product will also decrease. There is no capital protection against Market Risk.

Intended Retail Investor: This Product is intended for all kinds of investors who are looking for capital growth and/or optimization and have an investment horizon which is at least equal to the recommended holding period shown below. Only those investors who have the ability to make an informed decision based on sufficient knowledge and understanding of the Product and the market and the ability to bear a loss up to a total loss of their investment should consider investing in the Product. The Product does not offer a capital guarantee.

What are the risks and what could I get in return?

The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Lower risk **Higher risk**

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. We have classified this Product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high risk. Furthermore, poor market conditions will likely impact the capacity of Manufacturer to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** This Product does not include any protection from future market performance so you could lose some or all of your investment. The following risk may be materially relevant to the Product but may not be adequately captured by the summary risk indicator and may cause additional loss: Risk of Investing in Emerging Markets Issuers, Risk of Investing in Natural Resources Companies and Risk of Investing in Small- and Medium-Capitalization Companies as further described in the Prospectus.

Performance scenarios and the assumptions made to produce them:

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years. Example Investment: USD 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	***There is no minimum guaranteed return. You could lose some or all of your investment.***		
Stress	***What you might get back after costs***	USD 2,000	USD 1,870
	Average return each year	-80.02 %	-28.53 %
Unfavourable	***What you might get back after costs***	USD 6,890	USD 12,940
	Average return each year	-31.12 %	5.29 %
Moderate	***What you might get back after costs***	USD 11,130	USD 17,160
	Average return each year	11.34 %	11.41 %
Favourable	***What you might get back after costs***	USD 21,990	USD 39,070
	Average return each year	119.92 %	31.33 %

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between September 2017 and September 2022. The moderate scenario occurred for an investment between July 2018 and July 2023. The favourable scenario occurred for an investment between January 2016 and January 2021. Your maximum loss would be that you will lose all your investment.

What happens if VanEck Asset Management B.V. is unable to pay out?

The assets of the Product are held in safekeeping by the Depositary and are separate assets to those of the Manufacturer. Therefore in the event of the insolvency of the Manufacturer, the Products assets will not be affected. In the event of the Depositary's insolvency, or someone acting on its behalf, the Product may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. The Depositary will also be liable to the Product and the investors for any loss arising from, among other things, its negligence or intentional failure properly to fulfil its obligations (subject to certain limitations). The Product's investments do not fall within the scope of any guarantee or compensation scheme.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.
- USD 10 000 is invested

Cost over time		
	If you exit after 1 year	If you exit after 5 years
Total costs	USD 51	USD 253
Annual cost impact (*)	0.5 %	0.5 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.0 % before costs and 11.4 % after costs. We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs
